

What You See...

What A Gold Class[™] Shop ALSO Sees...

Crumpled hood.

Front bumper missing.

Broken headlight.

Three-dimensional measuring needed to ensure the vehicle structure is correct.

Restraint system inspection needed to ensure proper function.

Damaged suspension parts that compromise safety.

Your vehicle may “look” the same when it’s repaired after an accident, but it may not be as safe to drive. So how do you know?

As a Gold Class shop, we’ve been trained on:

- ▶ How to see hidden damage that you may not see
- ▶ What can be repaired and what needs to be replaced
- ▶ Airbag and seat belt inspection
- ▶ Making the right decisions for a safe repair

Don’t guess. Call us today.
